

分离式直型前端电动马达

无刷电机

型号 | EM-2350J

产地 | Japan·Nakanishi

产品描述

Product Description

The Brushless Motor housing is made from precision ground, hardened, stainless steel (SUS) with an outside diameter of $\phi 22.8\text{mm}$

Excellent durability and high reliability are obtained by using a high-speed Brushless Motor, which eliminates the need for brush replacement and frequent maintenance

A quick disconnect cord is available for easy Brushless Motor removal

An air-cooling system with a small volume of air (30ℓ / min) is used to prevent heat buildup and allows for long continuous operation

规格参数

Model	Code No.	Speed Range	Max. Output	Cord Length	Weight
EM-2350J	7721	1,000-50,000min-1	200W	0.3m	260g
Standard Accessories		Wrench(20x24):1pc			
Options		Motor Cord: Length 4m (7722), 6m (7723), 8m (7724) (The Air Hose of the same length is included)
